

# How to get your dot(s) on the map: *Step-by-step guide*

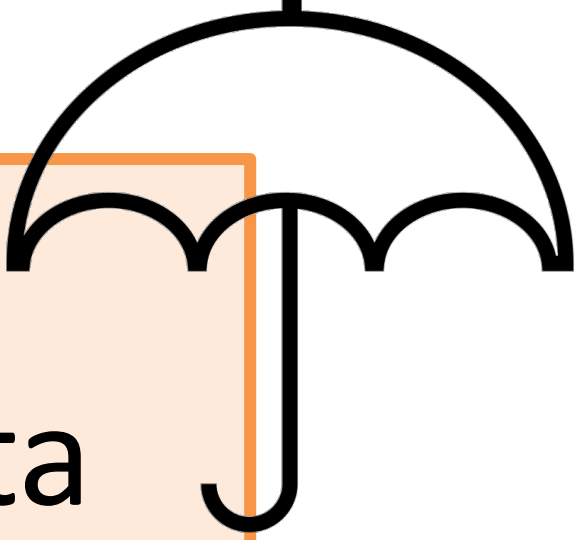

Step 1.

Download the metadata excel file 

Step 2.

Complete the file

 Tracking project metadata  
*(mandatory)*

 Umbrella project metadata  
*(desired)*

Are you tracking animals or do you have an array of receivers?

Is your project part of a larger set of projects? (e.g., is your project part of a larger project where one funding body is funding multiple telemetry projects?)

I am tracking animals

I have an array

Yes

No

Animal project

Network project

Fill out this file

Don't fill out this file

Note that data on tagged animals, receivers and/or detection files will be uploaded at a later stage!

Who Where When How

Step 3.

Send your completed metadata file to [etn@lifewatch.be](mailto:etn@lifewatch.be)

For questions contact your *Regional representative*

Step 4.

Your project should appear on the ETN database map within a few days!

Step 5.

What now?  
*You can upload data specific to your tagged animals, receivers and/or detection files through your ETN private data portal*
